How to enable Google Chrome web browser to view .pdf links

In your Chrome web browser, open a new tab. In the web address bar, type in, "about:plugins" without the quotation marks.

Scroll down until you see, "Chrome PDF Viewer". There is a "disable" button in the Chrome PDF Viewer box. Click on it.

Then scroll down until you see an option similar to, "Adobe Acrobat" or "Adobe Reader X". There is an "enable" button under this option. Click on it. There is also a checkbox right beside the enable button called, "Always Allow". Click on that as well.

Go back to the page you were viewing and you will notice your problem is now fixed.
